INTERAVIA

Review of World Aviation

INDEX TO VOLUME XI - 1956

GENERAL SUBJECTS

No. 1 V.T.O. Tomorrow
No. 2 Integration—the Imperative for Defence
No. 3 The Third Phase of Air Transport: Jet Transport
No. 4 Jet Transport—II
Billions are at Stake
No. 5 Air Force Training
Air Bases in the Sky
No. 6 Guided Missiles 1956
No. 7 Safe Journeys, Safe Landings
No. 8 Across the Bridge to Moscow
The Pentagon Dispute
Naval Air Power
No. 9 Aviation Days in Britain
Farnborough—Edinburgh
No. 10 Reshaping the Air Arm
Trends in Electronics
No. 11 Autumn Meetings
Edinburgh—Farnborough—Oklahoma—Scheveningen
No. 12 Sun, Moon and Stars

INDEX BY SUBJECTS:

The first number after each title refers to the magazine, the second number to the pages

International Organizations

I.C.A.O. The I.C.A.O. Spelling Alphabet—Walter Binaghi: 4/292
Warm Work for Caracas . . . Programme for I.C.A.O.'s Tenth Assembly: 6/451
Caracas . . . The Tenth Session of the I.C.A.O. Assembly: 8/626
I.A.T.A. Some of the Leaders of World Air Transport: 9/694
Air Transport's Biggest Challenge—Sir William P. Hildred: 9/694
Some Thoughts on Traffic Conferences—John Brancker: 9/695
Programme of the Twelfth Annual General Meeting: 9/696
Pillars of World Air Transport: 9/672
Brief Analysis of American and European Air Transport: 9/711
Twelfth Annual General Meeting, Edinburgh: 11/863
I.A.T.A. Sidelights
1. P.I.A. Establishes Engineering Base: 11/864
2. Garuda Grows Up: 11/866
3. South African Airways has Come of Age: 11/868
4. K.L.M.'s Battle for U.S. Routes: 11/870
5. The Diaper-Changing Derby: 11/872

Political

Delays in European Integration—Weaknesses in Air Defence: 2/95
A Provisional N.A.T.O. Plan for Western Europe's Air Defence: 2/103
German Rearmament: 5/362
British Aviation and the World Situation: 9/667
No Cut-Price Security: 9/668
Preparing for Elections not only in Washington—But Also in Bonn: 10/771
" Little Wars " Need Big Battalions: 10/773
Three Different Types of Air Armament are Needed: 10/774
Western Europe, the Arab States and Middle East Oil: 10/781
Bonn: The Slow Pace of Rearmament: 11/906

Air Transportation

" Aeroflot "—François de Geoffre: 1/41
Air Transport in the Chinese People's Reoublic—Pien Jen-Keng: 1/46
The Third Phase of Air Transport: 3/163
Turbine Transport Experience—Sir Miles Thomas: 3/166
Will the Airlines be able to Operate their Intercontinental Jet Transports?—Raymond Dupré: 3/168
The Coming Jet Transport Fleet: 3/174
Some of the Problems in the Certification of Jet Transport Aeroplanes—H. C. Black: 3/186
Billions are at Stake: 4/243
The Economic Aspects of Jet Transport—Dipl. Ing. Armin Baltensweiler: 4/244
The Jet Transport and its Effect on Airport Construction—Herbert Weibel: 4/248
Atlantic Traffic in 1960—Pierre M. Gallois: 4/253
The Speed We Need—William P. Lear: 4/267
J.A.L. Orders Jets: 4/268
The East German Lufthansa Makes its Bow: 5/370
Aeroflot's Activities: 8/592
Some of the Leaders of World Air Transportation: 9/694
Brief Analysis of American and European Air Transport: 9/711

Air Safety

Safe Airways: 7/499
Commercial Aviation Safety Increases Twentyfold in Twenty Years: 7/500
Ben Howard's Proposals for Improving Air Safety: 7/502
Warning on U.S. Aviation Facilities: 7/505
Designing for Aircraft Safety—M. Carl Haddon: 7/519
Training Air Crews for Safety—Ben Nicks: 7/524
Constant-Pressure Separation for Aircraft—A. J. Ferreira: 7/546

Service Aviation

Steep-Gradient Aircraft—A Military View: 1/22
The Future of Military Air Logistics: 4/263
Air Bases in the Sky: 5/332
The First Africa-based Jet Bombers are Il-28s: 5/369
The Intercontinental Ballistic Missile will Change Tactics but not Strategy: 6/408
The U.S. Forces Fight it Out: 8/594
Sea-Borne Airfields—James H. Smith, Jr.: 8/598
Some World Records Held by U.S. Navy: 8/598
The Development of Deck Landing Aids Since World War II— Commander K. A. B. MacDonald: 8/605
Naval Aviation in 1956—Vice-Admiral P. Barjot: 8/608
U.S. Naval Aircraft in Anti-Submarine Warfare: 8/611
Life Aboard a Carrier: 8/612
Guided Missile Vessels: 8/614
Role of High Performance Water-Based Naval Aircraft: 8/616
The Assault Helicopter Aircraft Carrier: 8/617
The Royal Netherlands Naval Air Service—Rear Admiral J. M. Van Olm: 8/628
Breguet Designs for the French Naval Air Arm: 8/629
The Helicopter is the Maid of All Work: 10/777
Russian Squadrons Leave Eastern Germany: 10/782

Training

São José dos Campos, Brazil's Centro Tecnico de Aeronautica: 2/112
SAAB BT-13 An Electronic Hit Indicator: 2/122
Training the New Japanese Air Force: 3/194
Who is Going to Fly the Things?: 5/331
Training for Global Efficiency: 5/336
Future Pilots for Supersonic Aircraft: 5/340
All-Through Jet Training: 5/341
R.A.F. Engineer Officers' College: 5/345
Sweden Modernizes its Flying Training: 5/351
Training the New German Air Force—Lieutenant Colonel J. Poetter: 5/353
New Flight Simulators for Military and Civil Crews: 5/356
Training Air Crews for Safety—Ben Nicks: 7/524
A Simulator for Training G.C.A. Controllers—G. Manuel: 7/526
Instructor for the Thousands—Ed Link and his Binghamton Works: 10/796

Vertical Take-off and Landing

Outlook for 1956: Towards New Take-Off Methods: 1/19
Steep-Gradient Aircraft—A Military View: 1/22
Technical Aspects of Steep-Gradient Aircraft—Maurice A. Garbell: 1/27
Main Categories of Powered Aircraft in Major Flight Phases: 1/32
Propulsor Characteristics: 1/34

Ground Organization

The Airfield Surface Movement Indication Radar at London Airport—Charles Bovill: 2/130
The Jet Transport and its Effect on Airport Construction—Herbert Weibel: 4/248
Intercontinental Airports for Jet Services: 4/250
A Runway Silencer for Jet Engines—A. Boët: 4/291
Warning on U.S. Aviation Facilities: 7/505
A Five-Year Plan for the American Airway System: 7/514
A Simulator for Training G.C.A. Controllers—G. Manuel: 7/526
The Importance of Terminal Air Surveillance Radar—Spencer Ross: 7/543
Radar Network for Traffic Control in Canada: 7/545
U.S. Bases in Spain: 8/618
London Airport: 9/724
Airfield Fuelling Trucks: 10/821

Research and Production

The U.S.A.F.'s New Emergency Production Policy: 2/111
São José dos Campos, Brazil's Centro Tecnico de Aeronautica: 2/112
Recording Flight Data in Commercial Aircraft—Jean de Lagarde and Paul Féton: 2/127
Some of the Problems in the Certification of Jet Transport Aeroplanes—H. C. Black: 3/186
Wingless Jet Flight in 1975?: 3/188
Fairchild Builds a Submarine: 3/189
Self-Sufficient Transport: 4/269
There is no Finality in Aviation—F. R. Banks: 4/285
Ten Years of ATAR Development—R. Constant: 4/287
The Eifel Radio Astronomy and Basic Radar Research Station—Professor Leo Brandt: 10/793
The X Series of Research Aircraft: 10/804
The Role of Electronic Computers in Aviation—René Derveaux: 11/903
Recent American Wind Tunnels: 11/904

Navigation - Radar - Aviation Electronics

Radar in Anti-Aircraft Defence: 1/55
The Evolution of Radar in Aviation—R. Aubert: 1/56
Radar Patrol: 2/120
The Airfield Surface Movement Indication Radar at London Airport—Charles Bovill: 2/130
Dectra—for the North Atlantic—Howard Capes: 3/204
Smiths Flight System: 5/371
The Role of the Stable Platform in Inertial Navigation—Dr. C. J. Breitwieser: 6/447
Air/Ground Communications—P. Oomen: 7/507
Development Trends in Radio Navigation—Dipl. Phys. Walter Stanner: 7/511
Some Home Truths on Aircraft Instruments—Jacques Lecarme: 7/539
The Importance of Terminal Air Surveillance Radar—Spencer Ross: 7/543
Radar Network for Traffic Control in Canada: 7/545
Constant-Pressure Separation for Aircraft—A. J. Ferreira: 7/546
Air Navigation and Approach Aids in the U.K.—E. J. Dickie and J. L. C. Briscoe: 9/723
Recent Trends in Aviation Electronics—Dr.-Ing. E. Kramar: 10/784
Electronic Problems Encountered in High Speed Commercial Jet Aircraft—R. H. Jerome: 10/791
The Eifel Radio Astronomy and Basic Radar Research Station—Professor Leo Brandt: 10/793
The TACAN System and the Results of the Alaska Tests: 10/815
Marconi Italiana Two-Channel HF Transmitter: 10/822
British Airborne Communications Equipment—J. H. H. Grover: 11/894

Electro-Gravitics

Towards Flight Without Stress or Strain . . . or Weight—Intel: 5/373
Albert Einstein and Gravitics Research—M. Gutmann: 5/375
Electro-Gravitic Propulsion—L. A. A. Gérardin: 12/992

Meteorology

Grasshoppers for the Antarctic: 3/203

Aircraft

Commercial Aircraft. "All You Do is Put It Together" (Fletcher FU-24): 1/40
Second-Generation Turboprop Airliner (Vickers *Vanguard*)—Boffin: 2/115
The Coming Jet Transport Fleet: 3/174
Caravelle
Comet IV
Boeing 707-320
Douglas DC-8
Characteristic Data for Jet Transports under Construction: 3/177
The New DC-8—Arthur E. Raymond: 3/184
A.T.A. Operating Costs for the DC-8: 3/184
TU-104, London premiere of Russia's jet transport: 5/359
Designing for Aircraft Safety (Lockheed Electra)—M. Carl Haddon: 7/519
Main Data for the Electra: 7/520
TU-104s for Export: 7/542
Last of the Piston-Engined Transports? (Lockheed L-1649A): 11/878
Mock-Up Inspection at Santa Monica (Douglas DC-8): 11/895
Aircraft Comfort in 1959 (Boeing 707): 12/968
Military Aircraft. Crusader and Cutlass: 3/191
Background to the English Electric P.1: 3/192
Saab A 32 Lansen in Production: 4/275
Review of Jet Trainers: 5/342
Recent Piston-Engine Trainers: 5/344
Lockheed Reveals the F-104A Starfighter: 5/360
Yet another jet trainer—the Temco Model 51: 5/368
The Bomber Becomes Faster than the Fighter (Lockheed F-104): 6/439
The Saab-35 Draken in Production: 11/909
Saab Draken Makes its Press Début: 12/978

Power Plants

Characteristic Data for Selected High-Power Jet Engines: 3/176
Ten Years of ATAR Development—R. Constant: 4/287
Power Plants at Farnborough: 11/886

Guided Missiles, Rocketry and Astronautics

France's Guided Missiles: 1/50
Honest John in Germany: 2/110
"The Last Weapon but One" (Guided Missile Ships): 3/190
Faster, Higher, Hotter—Theodore von Karman: 6/407
The State of the Art—Erik Bergaust: 6/413
Recent Guided Missiles: 6/418
Not Quite so Secret (Britain's guided weapons): 6/430
Guidance Systems for Anti-Aircraft Rockets—Dr. Ing. Alfred Gerber: 6/432
Environmental Considerations of Space Travel from the Engineering Viewpoint—A. M. Mayo: 6/435
Missile Note-Book: 7/547
The Anti-Missile Missile May not be a Myth: 10/779
Guided Missiles at Farnborough: 11/891
Sun, Moon and Stars: 12/947
Our Century will see the Birth of Astronautics—G. A. Crocco: 12/948
The 7th International Astronautical Congress, Rome: 12/950
The IGY Rocket and Satellite Program—J. Kaplan: 12/953
The Artificial Earth Satellite—Past, Present and Future—S. F. Singer: 12/956
Instrumental Satellites and Instrumental Comets—K. A. Ehricke: 12/960
Satellites as Weapons: 12/967
An Airborne Method of Launching Satellites—A. C. Robotti: 12/970
The Surface-to-Surface Missile, Today and Yesterday (I)—F. I. Ordway: 12/974
Can Man Reach Distant Celestial Bodies?—J. Ackeret: 12/989

Exhibitions and Congresses

Zurich 1956: 7/529
Tushino 1956
The First Bridge to Moscow: 8/584
Programme of the Tushino Air Display June 24th, 1956: 8/586
Tushino Comments: 8/588
Marshal Zhukov Receives: 8/591
The Chiefs of the Foreign Air Delegations in Moscow: 8/591
Marshal G. K. Zhukov's Address: 8/592
Aeroflot's Activities: 8/592
Farnborough. Aviation Days in Britain—Farnborough and I.A.T.A.—Reginald Maudling and Harold Watkinson: 9/670
Military Aviation—U.K.: 9/671
The Future of British Long-Range Air Services—Basil Smallpeice: 9/674
The British Aircraft Industry Changes Course: 9/680
British Commercial Transports on Order: 9/681
An A.B.C. of the British Accessories and Equipment Industry: 9/683
Programme of Selected Airframe Manufacturers: 9/685
Programme of Selected Engine Manufacturers: 9/686
Scheduled Helicopter Services—Problems and Prospects—R. H. Whitby: 9/692
A Glance at the Farnborough Exhibition Tent—Electronics and other equipment: 10/818
The 17th S.B.A.C. Flying Display and Exhibition: 11/883
Power Plants at Farnborough: 11/886
Small-Scale Models: 11/890
Guided Missiles at Farnborough: 11/891
Equipment at Farnborough: 11/892
The Second European Aeronautical Congress: 11/873
Oklahoma!: 11/874
The 7th International Astronautical Congress, Rome: 12/950

Air Law

Damage due to Aircraft Noise—Maître Jean T. Lacour: 4/258

Aviation Finance

American Aviation Woos the Capital Market: 4/283
U.S. Aviation Stocks, Capital, Dividends, Stock Prices etc.: 4/284

Biographical - Historical

Frederick B. Rentschler: 6/451

Miscellaneous

The Air Hostess Told Us . . . : 1/39; 3/185; 4/275; 10/803
Flight into the Desert: 1/48
Canada's Aviation in 1956: 4/270
The Designer's Dilemma—R. Osborn: 7/522
Esprit de Corps also Plays its Part—Gustave Jean Lefèvre: 7/528
Are They Finally Getting Together?: 8/583
Sky Styles: 9/697
They Beat Us By 150 Million Years—Norman S. Currey: 11/876

Equipment Round-Up

1/58; 3/206; 7/548; 9/726; 12/993

Book Reviews

1/60; 2/133; 3/208; 5/376; 6/452; 7/550; 9/728; 10/823; 11/909; 12/995

Correspondence

1/57; 2/133; 4/293; 5/375; 9/727; 11/908; 12/994

What's in the Air?

1/52; 2/124; 3/196; 4/276; 5/365; 6/440; 7/532; 8/623; 9/716; 10/803; 11/896; 12/980
